Supplemental Addendum

Borrower	Censo LLC			
Property Address	5900 Negril Ave			
City	Las Vegas	County Clark	State NV	Zip Code <b>89130</b>
Lender/Client	N/A			

Appraiser has not performed a previous appraisal or any other services regarding the subject property within the three years prior to acceptance of this assignment.

Appraiser, Gerene McNatt, has been a Licensed Residential Appraiser in the state of Nevada continuously since 1998, primarily working in the Las Vegas valley and surrounding Clark County. Appraiser is familiar with subject neighborhood and market area, having performed numerous valuations in this area for purposes of sale, refi, REO and general purposes and is confident of having the experience and qualifications to complete this assignment. Fee for this appraisal report is \$300.00.

#### Neighborhood:

Bounded north by 215 Beltway, south by W Ann Rd, west by N Rainbow Blvd and east by N Decatur Blvd. Neighborhood and surrounding market area is primarily single family residential including both tract and custom homes, with minimal commercial. Other land use is public facilities, including schools, parks, post office and houses of worship. Subject project is a gated PUD with private streets; HOA is responsible for maintenance of the private streets and other common elements. HOA fee is \$50 per month.

#### **Market Conditions:**

Median prices in this market increased by prox 9% year-over-year due to persistent low inventory. Time adjustments are applied in comparable sales grid from contract date based on average monthly increase in values for subject market (0.75% per month). Criteria for market data included comparable 1-story properties within 20% of subject square footage and within 10 years of subject age, with swimming pool, located in subject neighborhood and surrounding market area (portion of MLS area 102 south of the 215 Beltway). Reasonable marketing/exposure time 16 days. Source is Multiple Listing Service statistics. Note that market data does not include homes in the nearby golf course project of Los Prados Country Club.

#### Comparable Sales Research:

Criteria for comparable sales included 1-story properties within 20% of subject GLA and within 10 years of subject age with a pool. Preference was to bracket subject GLA and include sales which share similar attributes with the subject and located within 1.0 mile if available. Due to finding only one comparable sale within one mile, the surrounding market area was utilized and an additional 4 sales were located; however, one sale was a court -supervised probate sale not utilized as probate sales typically not sold at market value. Additionally, one property was not utilized as had high-end amenity of a casita.

Standards Rule 1-4(a) of the Uniform Standards of Professional Appraisal Practice (USPAP) requires, when necessary for credible results, that the appraiser analyze such comparable sales data as available to indicate a value conclusion. To overlook a relevant segment of that data would be contrary to what is required by USPAP. Furthermore, appraisal theory provides that the principle of substitution dictates that buyers will not pay more for a property than the price of an equivalent substitute property. Therefore, the value of a property is limited by its competition. If the pool of competitive properties includes enough distress properties, those properties will, in effect, establish a value ceiling.

#### Reasonable Exposure Time :

Exposure time is the estimated length of time the subject property would have been offered on the market, prior to the hypothetical sale, at the appraised value, on the effective date of the appraisal. It is a retrospective estimate based on an analysis of past events assuming a competitive and open market. Under market conditions within the 3 months prior to effective date of this report, appraiser's opinion of reasonable exposure time for the subject property is 16 days. This is based on analysis of market trends and data, including statistical information from local Multiple Listing Service. It presupposes that the listed price would be at or near the appraised value. It also assumes aggressive marketing by a reputable real estate professional.

#### Comparable Sales Grid:

Adjustments for value-related items, including amenities and interior and exterior upgrades are derived from market by group sales data on MLS and/or matched pair sales analysis, whichever results in the most credible and supportable adjustments. Data retained in appraiser workfile. Age adjustments are not utilized within 10 years differential; emphasis is placed on condition and appeal. Time/market adjustments are applied from contract dates and based on average monthly increase in values for subject market; i.e. 9% increase year-over-year = 0.75% average monthly increase multiplied by number of full months from contract date to effective date of this report; total percentage is then multiplied by sales price of the comparable. No time adjustments applied if percentage is less than 1%. Livable square footage adjustments applied at 30% of average sale-price-per-square foot of the comparable sales. Site adjustments applied at \$2.00 per s/f ft when exceeding 3,000 s/f differential.

#### Summary of Sales Comparison Approach:

The comparable sales utilized in this report establish a market value range from \$358,500 to \$370,000. Primary consideration given comp no. 2 with most recent sale date. Secondary weight accorded comp no. 3 with closest geographic proximity. Comp no. 1 supports subject concluded opinion of market value.

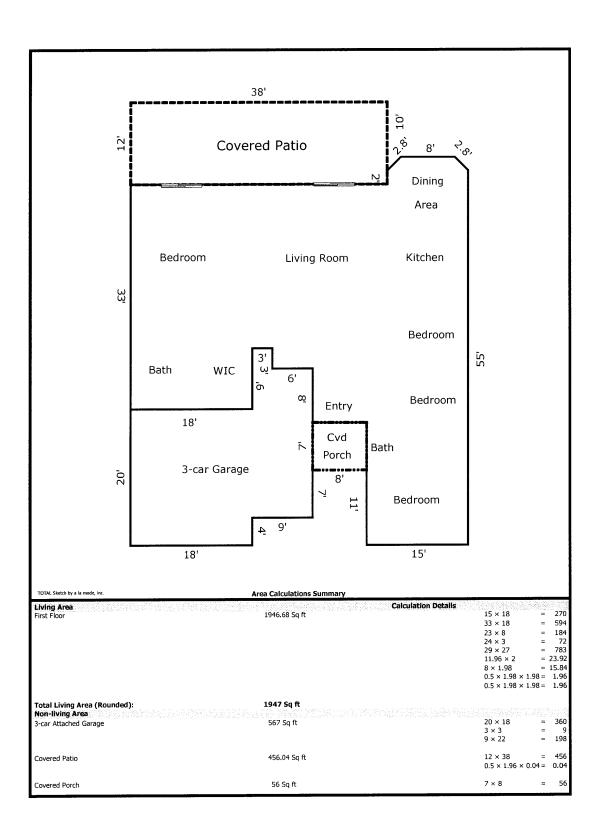

#### Final Reconciliation:

Estimate of market value derived using the Sales Comparison Approach. The Cost and Income approaches are not developed in this report base on the needs of the Client.

Assumptions, Limiting Conditions & Scope of Work

SSUI	npuons, Liinung	Collultions & Scope of Work	File No.:	9121162	
Property A	ddress: 5900 Negril Ave	City: Las Vegas	State: NV	Zip Code: <b>89130</b>	
Client:	Censo LLC	Address: 9811 W Charleston Blvd #2-38	1, Las Vegas, N	V 89130	
Appraiser:	Gerene McNatt	Address: 3642 Boulder Hwy #185, Las V	egas, NV 89121		

#### STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
- The appraiser may have provided a sketch in the appraisal report to show approximate dimensions of the improvements, and any such sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size. Unless otherwise indicated, a Land Survey was not performed.
- If so indicated, the appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area.
   Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand.
- If the cost approach is included in this appraisal, the appraiser has estimated the value of the land in the cost approach at its highest and best use, and the improvements at their contributory value. These separate valuations of the land and improvements must not be used in conjunction with any other appraisal and are invalid if they are so used. Unless otherwise specifically indicated, the cost approach value is not an insurance value, and should not be used as such.
- The appraiser has noted in the appraisal report any adverse conditions (including, but not limited to, needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property, or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property, or adverse environmental conditions (including, but not limited to, the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of the property.
- The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
- The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice, and any applicable federal, state or local laws.
- If this appraisal is indicated as subject to satisfactory completion, repairs, or alterations, the appraiser has based his or her appraisal report and valuation conclusion on the assumption that completion of the improvements will be performed in a workmanlike manner.
- An appraiser's client is the party (or parties) who engage an appraiser in a specific assignment. Any other party acquiring this report from the client does not become a party to the appraiser-client relationship. Any persons receiving this appraisal report because of disclosure requirements applicable to the appraiser's client do not become intended users of this report unless specifically identified by the client at the time of the assignment.
- The appraiser's written consent and approval must be obtained before this appraisal report can be conveyed by anyone to the public, through advertising, public relations, news, sales, or by means of any other media, or by its inclusion in a private or public database.
- An appraisal of real property is not a 'home inspection' and should not be construed as such. As part of the valuation process, the appraiser performs a non-invasive visual inventory that is not intended to reveal defects or detrimental conditions that are not readily apparent. The presence of such conditions or defects could adversely affect the appraiser's opinion of value. Clients with concerns about such potential negative factors are encouraged to engage the appropriate type of expert to investigate.

The Scope of Work is the type and extent of research and analyses performed in an appraisal assignment that is required to produce credible assignment results, given the nature of the appraisal problem, the specific requirements of the intended user(s) and the intended use of the appraisal report. Reliance upon this report, regardless of how acquired, by any party or for any use, other than those specified in this report by the Appraiser, is prohibited. The Opinion of Value that is the conclusion of this report is credible only within the context of the Scope of Work, Effective Date, the Date of Report, the Intended User(s), the Intended Use, the stated Assumptions and Limiting Conditions, any Hypothetical Conditions and/or Extraordinary Assumptions, and the Type of Value, as defined herein. The appraiser, appraisal firm, and related parties assume no obligation, liability, or accountability, and will not be responsible for any unauthorized use of this report or its conclusions.
